## Junior Software Engineer

Software Engineer with a robust foundation in HTML5, CSS3, JavaScript, and responsive frameworks like Bootstrap and Sass. I have a proven track record of designing, managing, and optimizing user-friendly, secure websites focused on enhancing user experience and mobile responsiveness. My knowledge in cybersecurity ensures the development of secure robust web applications. Proficient in JavaScript, React, TypeScript, and back-end technologies, including Node.js, SQL, and Express.js, I excel at building efficient and scalable full-stack solutions. Known for my problem-solving and analytical mindset, I have a proven track record of guiding teams through complex projects and challenging situations, leading to successful outcomes. My experience includes training and mentoring colleagues, enhancing team skills and cohesion. I am enthusiastic about leveraging this expertise and my diverse skill set to contribute effectively to your team.
